

## Ape Facts

- Apes are humans' closest living relatives.
- Apes are intelligent, using tools and communication to interact with their environment.
- Apes have strong mother/infant bonds and most live in close family groups.
- Apes have very expressive faces and behaviors.
- All apes have unique physical and behavioral adaptations.

## Threats to Ape Survival

- Even with the best intentions, roadside zoos and attractions cannot possibly provide apes with the best physical and psychological care.
- Although it may look innocent enough, an ape's life in the entertainment industry cannot possibly provide the best physical and psychological care.
- Ape adults are killed and their offspring are collected for the illegal pet trade - apes do not make good pets.
- Apes are losing habitat at an alarming rate.
- Apes are being hunted for their meat, which is commercially sold in the bushmeat trade around the world.
