4-8 Classroom Activities

Primate Life Instruction Booklet

OBJECTIVE

The student will identify various facts about individual primate species.

ACTION

1. Explain that the students will be creating a Life Instruction Booklet for an individual primate species. Instruct students to draw a piece of paper out of the bowl. The paper will identify a primate. Students will research and design their Instruction Booklet for the primate they picked.
2. Explain that the following concepts should be included in the Life Instruction Booklet. Each concept should be written as a chapter.

- Chapter 1: Range and Habitat
- Chapter 2: Diet
- Chapter 3: Predators
- Chapter 4: Social structure (family units, hierarchy, etc.)
- Chapter 5: Reproduction
- Chapter 6: Status (population, conservation issues)

The Life Instruction Booklet should be written as a self-help guide for the individual primate species.

3. Instruct students to include a one page essay on a day in the life of their assigned primate.
4. All students will present their Primate Life Instruction Booklet and their essay to the class.
